Bereke Bank

Sep 2025 · Oct 19, 2026

Middle Golang Developer

Auto Loan Issuance / Unified Credit Pipeline · high load · event driven

- Architected and built the company's **unified credit pipeline**, standardizing loan issuance across products and centralizing application routing and validation.
- Built numerous **production integrations** with government and financial services, including First Credit Bureau, collateral registries and identity verification.
- Designed fault-tolerant microservice architecture with strict **latency SLA** and event-driven communication via Kafka.
- Supported the auto-loan pipeline from pilot to production: parallelized processing, made issuance **more than 2.5× faster**, from 40 to 15 minutes, and grew volume to **130 applications per day within six months**.
- Built a corporate messenger alerting library and operational notifications for production workflows.

/ Go / PostgreSQL / Redis / Kafka / Camunda BPMN / Docker / GraphQL / REST

Ozon Tech

Aug 2024 · Sep 2025

Junior Go Backend Engineer

Employee platform · 3-person backend team · on-call ownership

- Co-designed the split of a large monolith into roughly **10 domain services**; built the employee-data service and cut average lookup time by **25%**.
- Sole backend owner of recurring compliance-questionnaire workflows, including employee assignment, notifications and legal administration.
- Automated attendance and seat reclamation for **10K+ employees**; the platform sustained **2,000 concurrent users** during rollout.
- Built a trademark-approval backend and Go document generator; also delivered analytics exports and video-preview workflows for files up to **2 TB**.

Go Backend Intern

Company-wide hiring platform · 4-person backend team · on-call

- Cut candidate-search p95 from **1.5-2 s to 500-850 ms** by fixing SQL indexes and rewriting Elasticsearch queries, verified through repeated load tests.
- Designed and built a candidate-update notification bot with reliable delayed delivery through Kafka.
- Joined the on-call rotation, resolved long-standing production defects and built Grafana dashboards for funnel anomalies and system errors.

02 Selected project

AdalQarau

CREATOR · BACKEND ENGINEER

Public procurement analytics platform

- Built rule-based corruption-risk detection across **15M+ contracts**, 197K buyers and 800K suppliers using eight indicator algorithms without labeled training data.
- Produced **448K risk flags** across all 20 regions of Kazakhstan; thresholds were calibrated with government auditors and used in real audit workflows.

SKILLS

Backend
Go, gRPC, REST/HTTP, GraphQL, Protocol Buffers

Data
PostgreSQL, Redis, ClickHouse, Vertica, Elasticsearch, MinIO/S3

Distributed
Kafka, Camunda BPMN, microservices, event-driven systems

Operations
Docker, Kubernetes, Grafana, Prometheus, GitHub Actions, Linux

EDUCATION

B.Sc. Software Engineering
Astana IT University
2023 · 2025

Previous studies
ITMO University, St. Petersburg
2021 · 2023
Two years completed before transferring to AITU.

LANGUAGES

- Russian · Native
- English · C1 professional
- Kazakh · Basic

AVAILABILITY

- Full-time · office / hybrid / remote
- Ready to relocate
